PROGRAM STUDI INFORMATIKA
UNIVERSITAS MULAWARMAN
SAMARINDA
2025

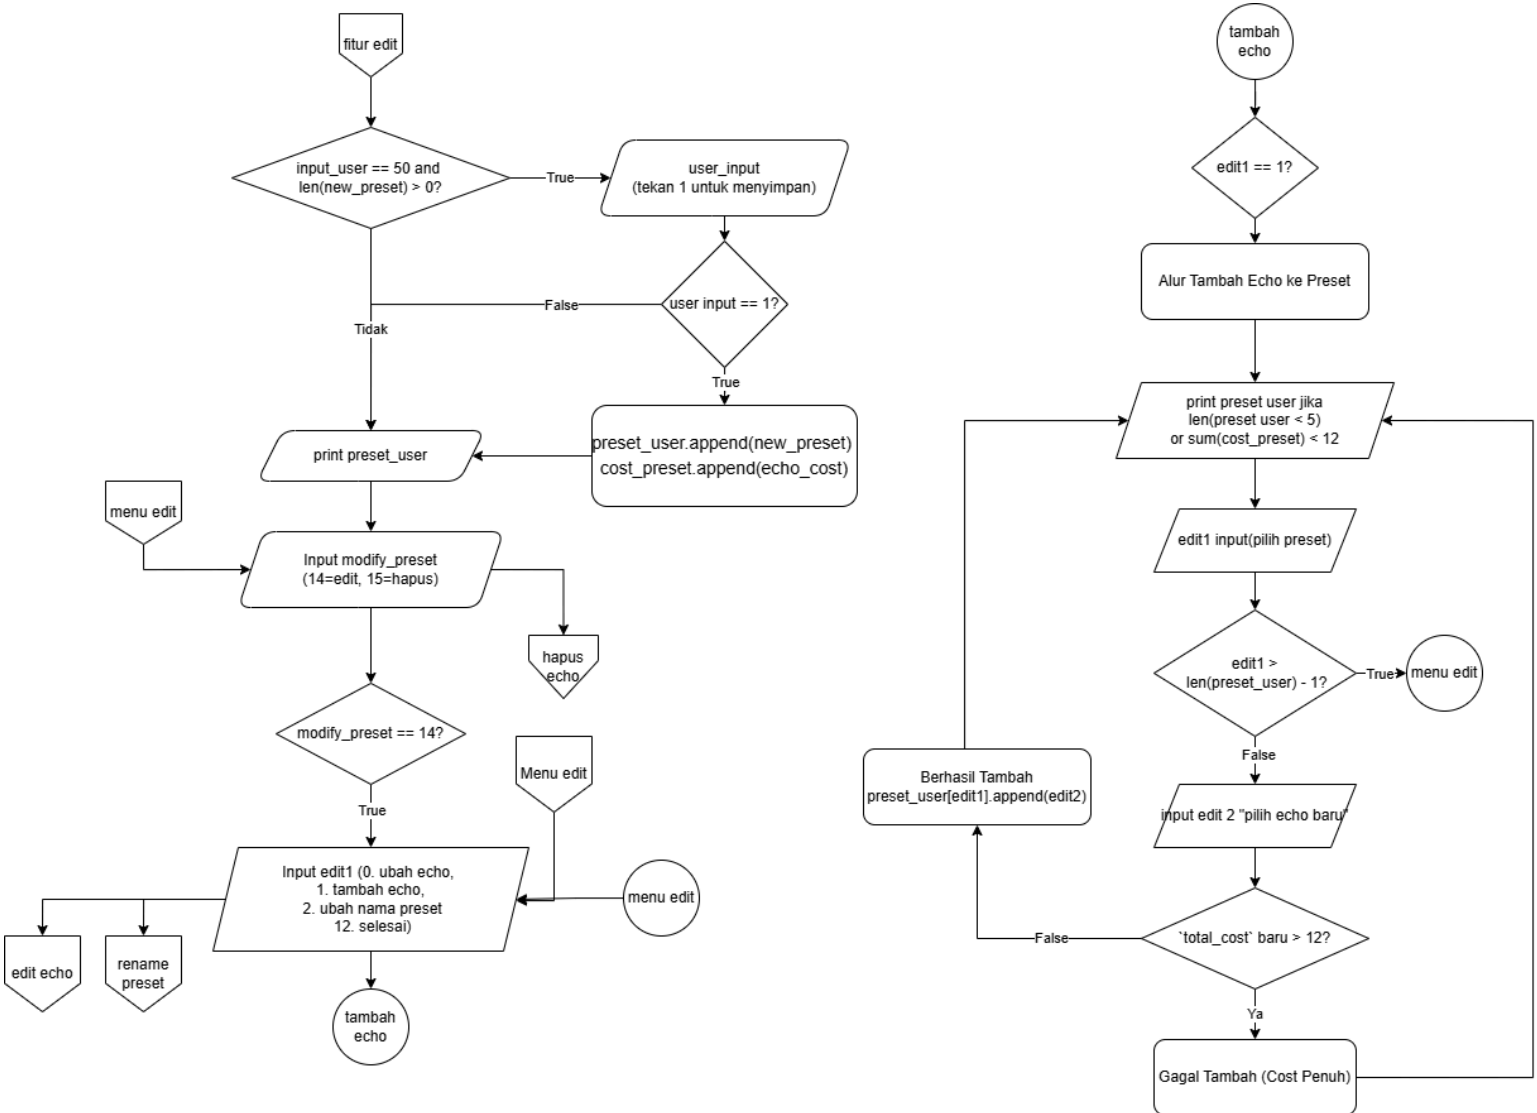

1. Flowchart

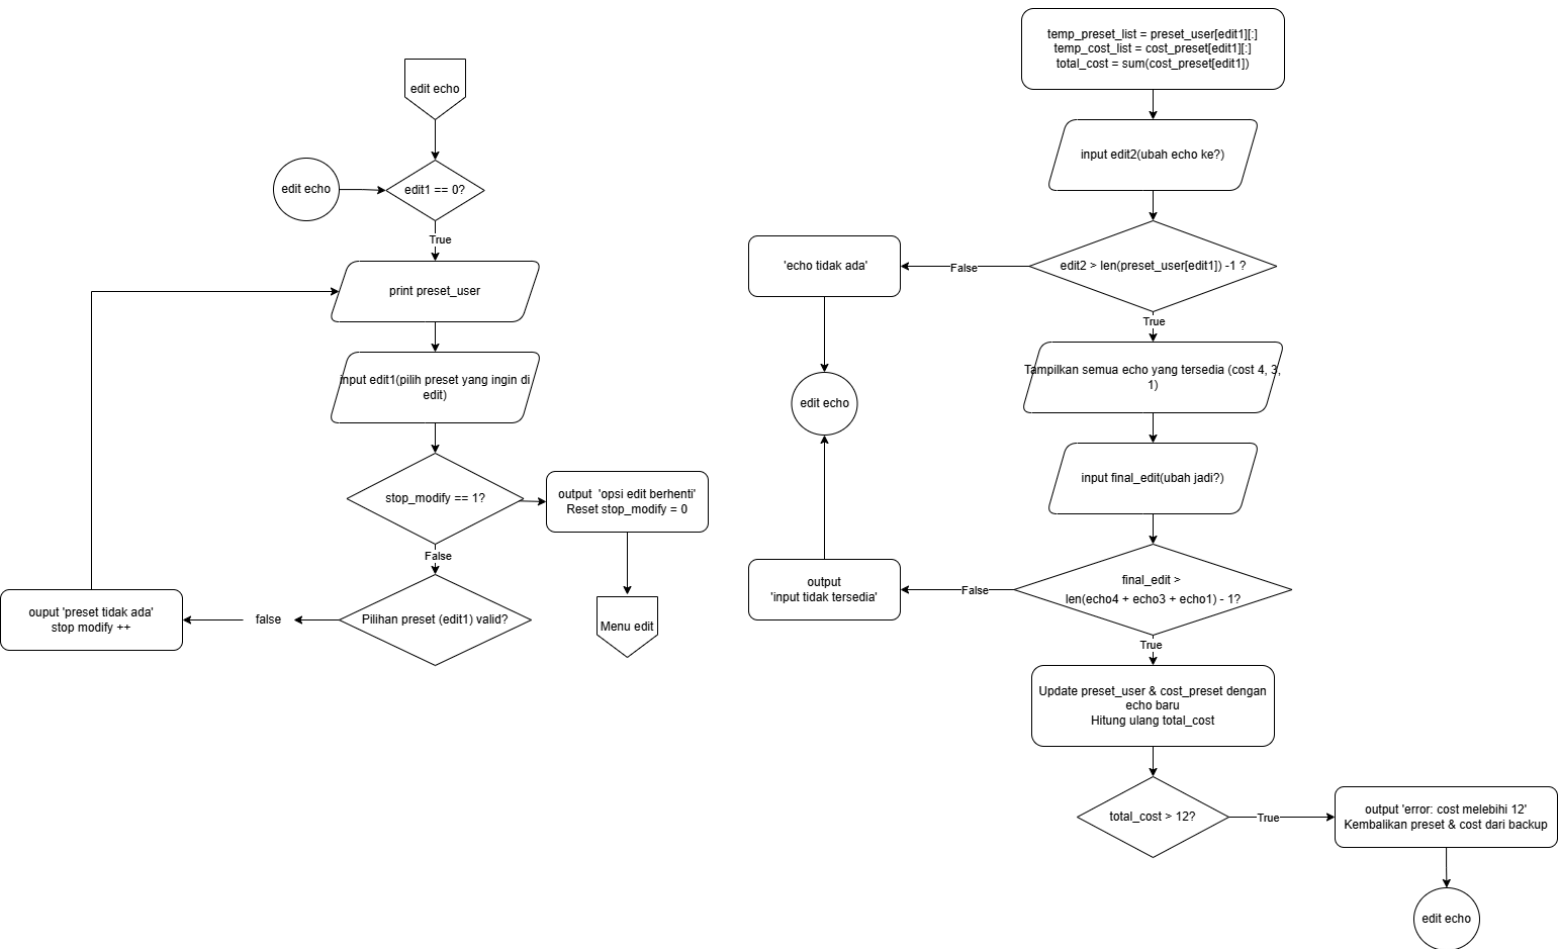

gambar 1.1 flowchart opsi login

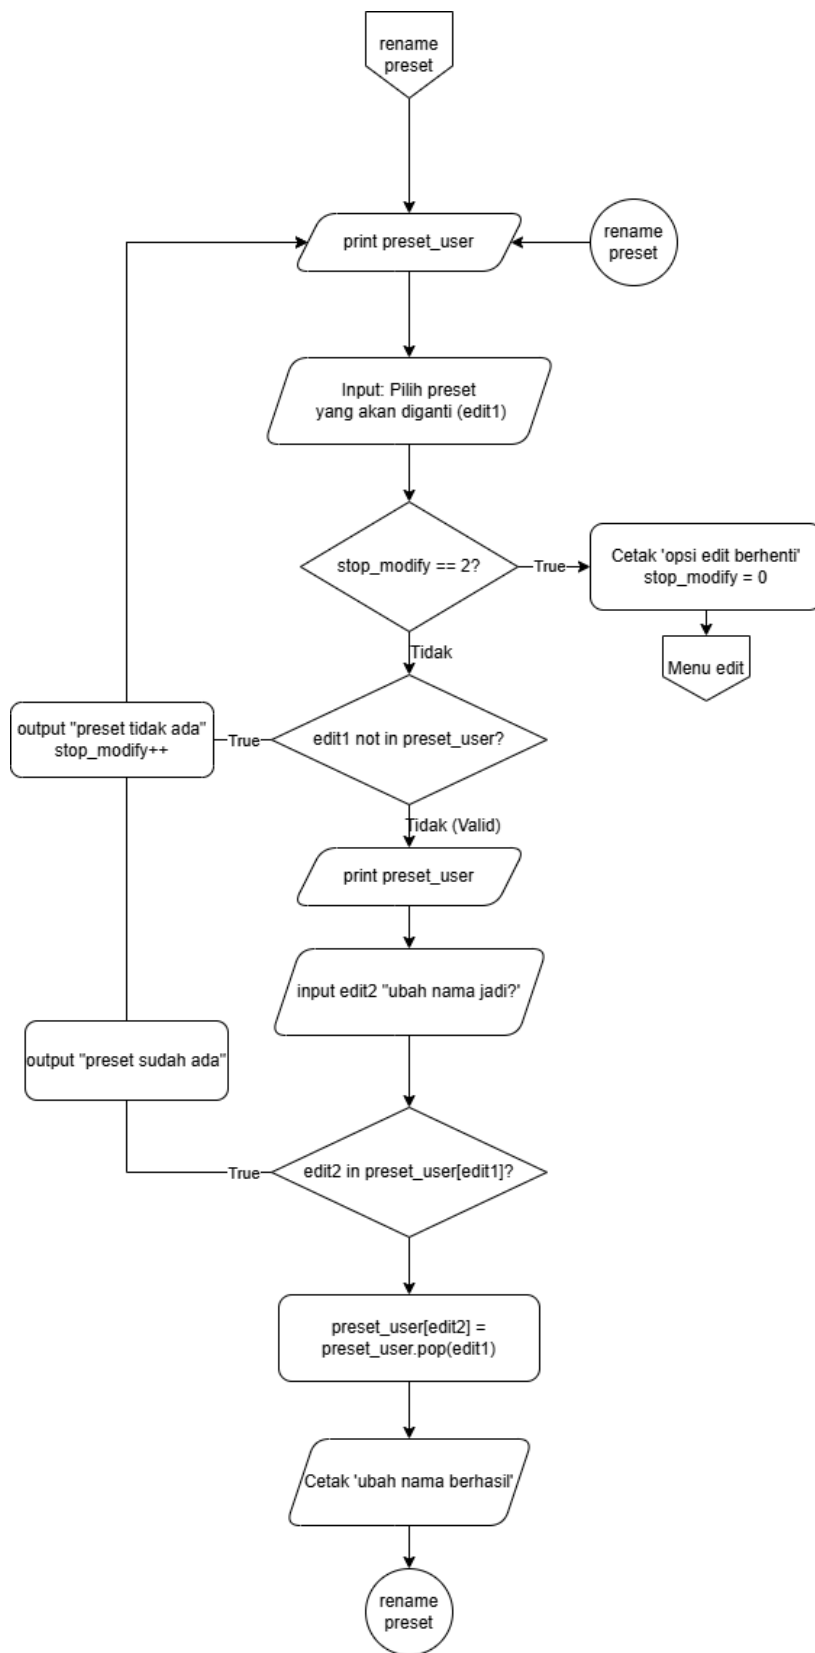

flowchart 1.2 flowchart opsi buat preset user

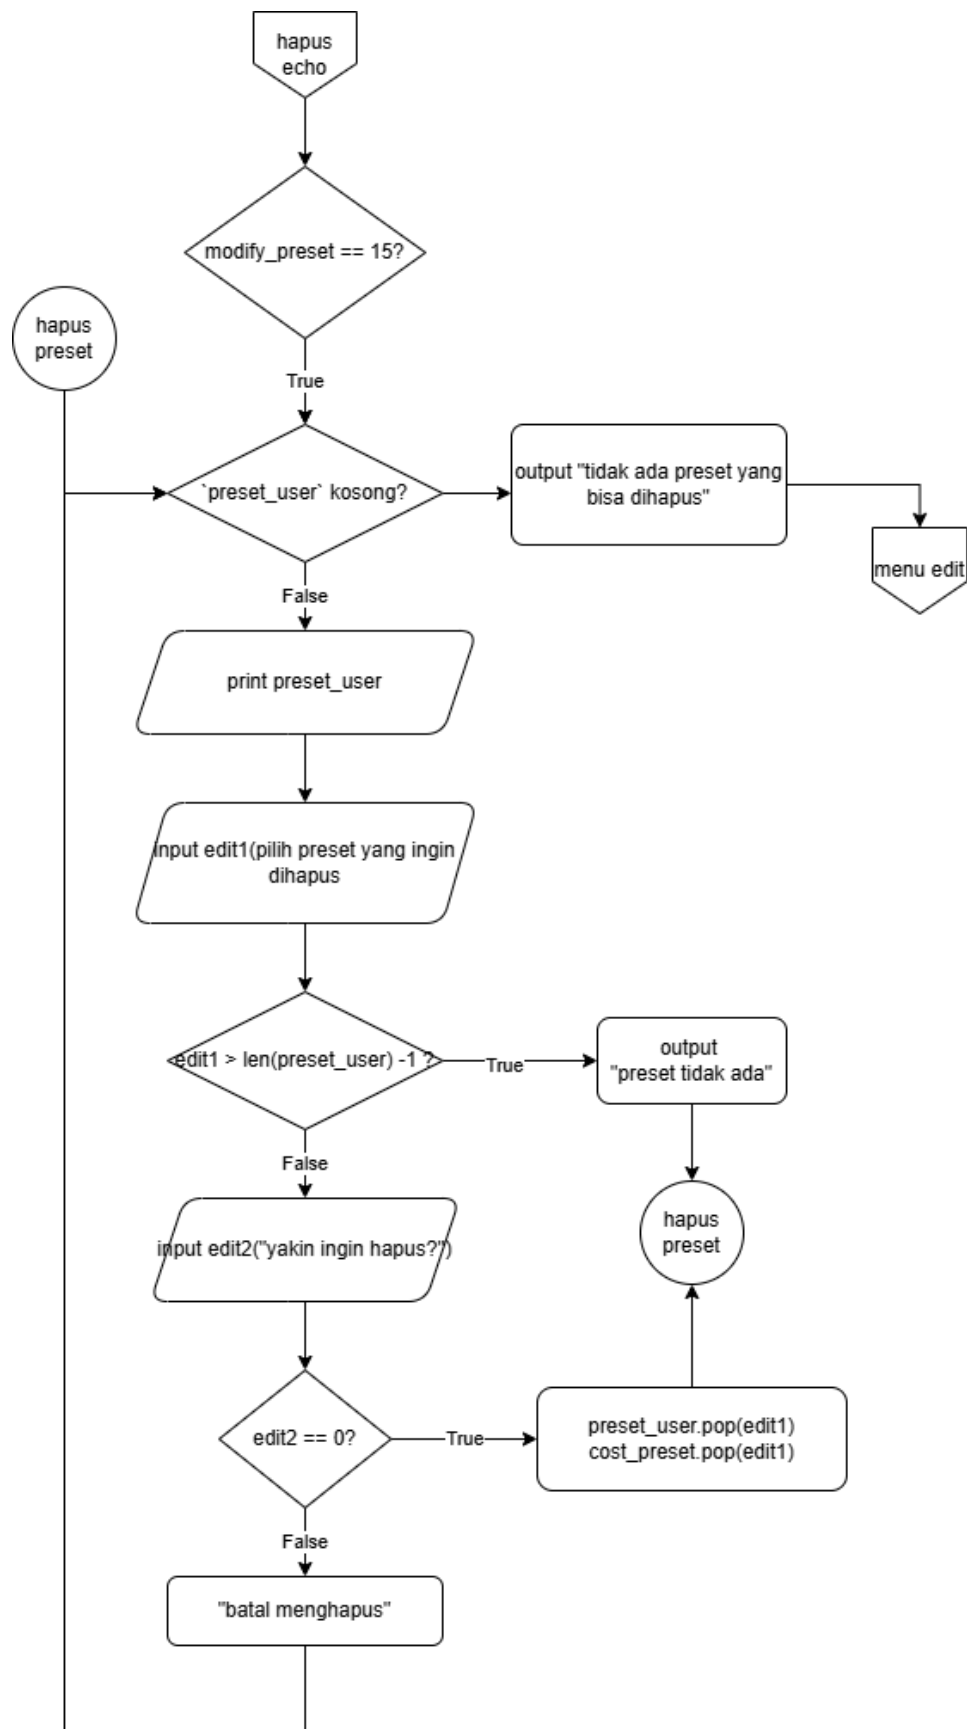

flowchart 1.3 flowchart opsi user dan edit user (menambahkan echo ke preset baru)

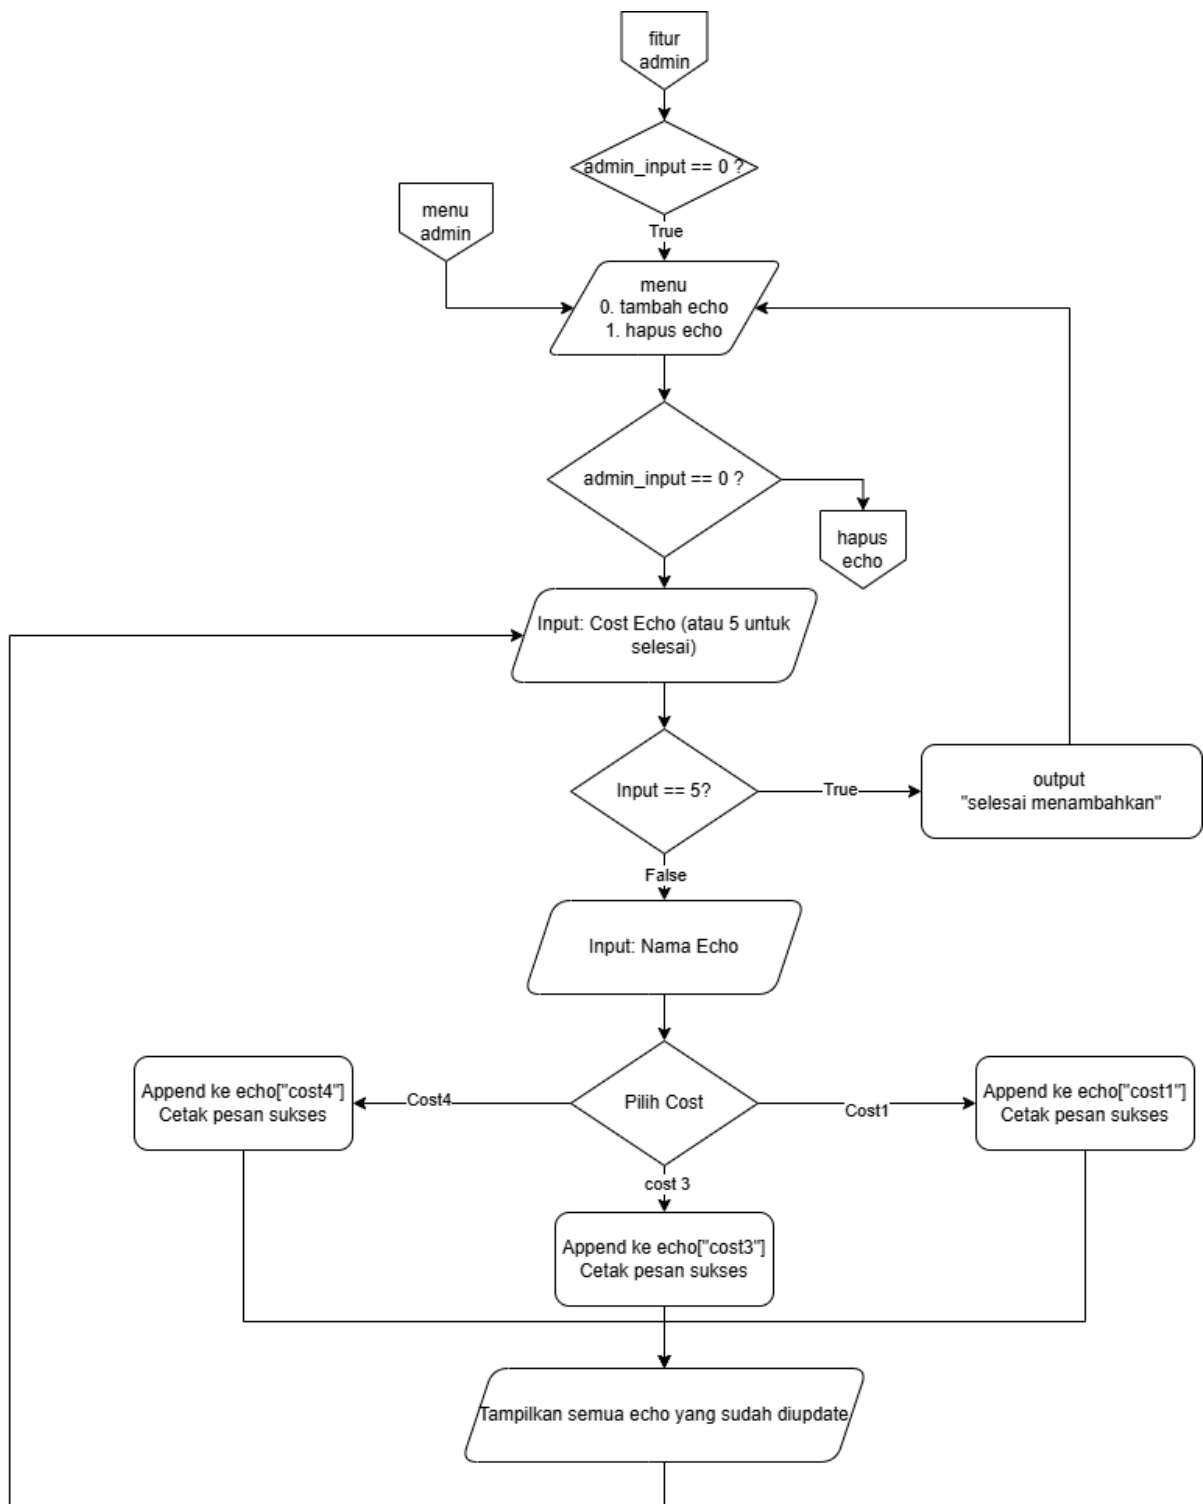

flowchart 1.4 flowchart opsi user(edit preset)

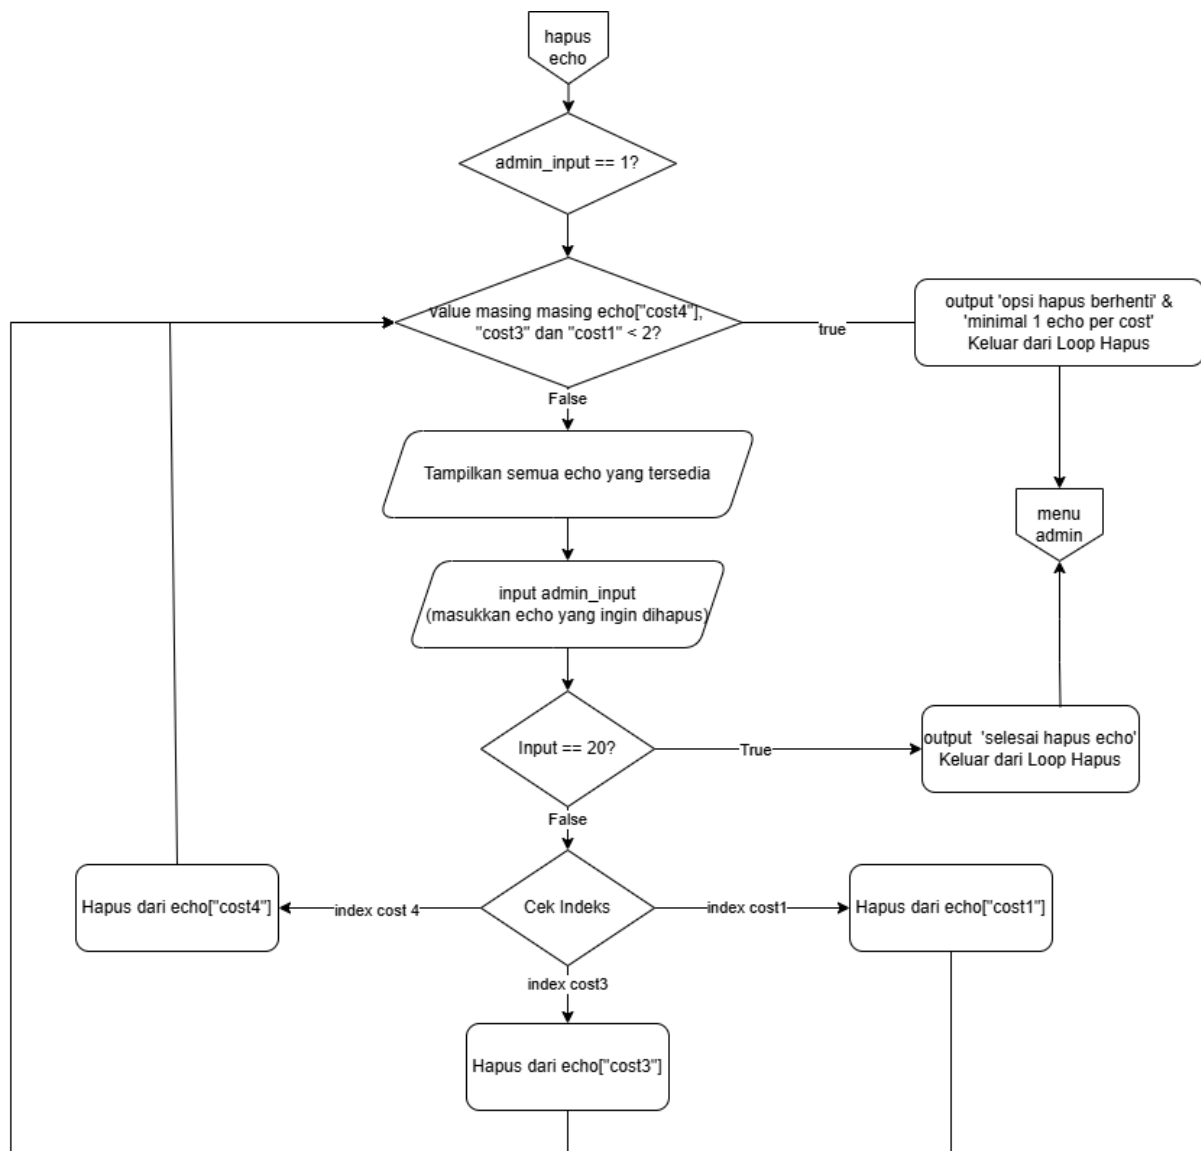

flowchart 1.5 flowchart opsi user (ganti nama preset)

flowchart 1.6 opsi user(hapus preset)

flowchart 1.7 flowchart opsi admin (tambah echo)

flowchart 1.8 flowchar opsi admin (hapus echo)

2. Deskripsi Singkat Program

pada posstest ini tujuan utamanya sama seperti posttest ke - 5 disini saya hanya mempeprbarui beberapa kode, seperti mengubah tipe data echo, preset user, dan user menjadi dictionary, sehingga pada posttest ini terdapat fitur baru, yaitu mengubah nama preset.

dengan menggunakan dictionary, preset akan disimpan sesuai user yang login, jadi jika login ulang, preset yang dibuat akan tetap ada jika ditampilkan

3. Source Code

A. fitur utama user

disini user bisa menambahkan echo nya ke preset sesuai keinginan dan syarat syaratnya (cost echo tidak lebih dari 12 dan slot preset belum terisi semua(slot preset masing masing terdapat 5))

Source Code:

```
if role == 1 or (admin_input == 0 and role == 0):
    print("echo cost 4 : ")
    for index,cost4 in enumerate(echo["cost4"]) :
        print(f"{index} : {cost4}")

    print("echo cost 3 : ")
    for index,cost3 in enumerate(echo["cost3"]) :
        print(f"{index + len(echo['cost4'])} : {cost3}")

    print("echo cost 1 : ")
    for index,cost1 in enumerate(echo["cost1"]) :
        print(f"{index + len(echo['cost4'] + echo['cost3'])} : {cost1}")

    print("tekan 20 untuk log out")
    print("tekan 50 untuk melihat preset yang ada")
    print("atau lanjut masukkan nomor echo untuk buat preset baru")
    input_user = int(input("masukkan pilihan : "))
    print("preset akan otomatis dibuat jika cost sudah 12 atau slot echo sudah 5")
    print("jika total cost preset sudah lebih 12, akan menghapus echo terbaru dan otomatis membuat preset baru")

    while input_user != 20 :
        #dibawah ini untuk buat buat preset baru
        while True :
            if input_user <= len(echo["cost4"]) - 1 :
                new_preset.append(echo["cost4"][input_user])

4. Hasil Output

```

masukkan lagi echo yang mau dipilih : 11
tekan 21 untuk selesai buat preset
masukkan lagi echo yang mau dipilih : 21
masukkan lagi echo yang mau dipilih : 21
new preset 0 : ['aero predator', 'aero predator']

```

Gambar 4.1 hasil output buat preset baru

```

echo yang dipilih : ['aero predator', 'aero predator', 'inferno rider', 'aero predator']
edit value yang ke? : 0
echo cost 4 :
0 : Bell-Borne Geochelone
1 : crownless
2 : Fellian Beringal
3 : inferno rider
echo cost 3 :
4 : chop chop
5 : chaserazor
6 : kerasaur
7 : hoochief
echo cost 1 :
8 : fusion prism
9 : gulpuff
10 : excarat
11 : aero predator
ubah aero predator jadi? : 2
nama preset : ['aero predator', 'aero predator', 'inferno rider', 'aero predator']
pilih preset yang ingin di edit (tekan 0 atau selain preset sebanyak dua kali untuk berhenti edit) :

```
